TX7N Marquesas Islands –update January 1

The TX7N team is hitting the road for Paris, their arms loaded with suitcases, equipment and above all, a lot of enthusiasm! After passing through Charles de Gaulle airport, we will take off towards Papeete, with a stopover in Los Angeles, before boarding the last flight which will take us to our final destination: Hiva Oa, in the heart of the Marquesas Islands. Each step brings us a little closer to this incredible adventure, and we can't wait to assemble our antennas in this exceptional setting. Thank you to all our supporters for their valuable help in this expedition. We'll see you very soon for the first live activations of the Marquesas!

C8K Mozambique DXpedition 2025 –postponed

It is with deep disappointment that we must inform you that due to the current security situation in Mozambique, we are compelled to postpone our planned expedition originally scheduled for departure on January 17, 2025.

After careful examination of the travel advisories issued by the US, UK, Germany, and the Czech Republic's foreign ministries, all of which have raised their warning levels and currently advise

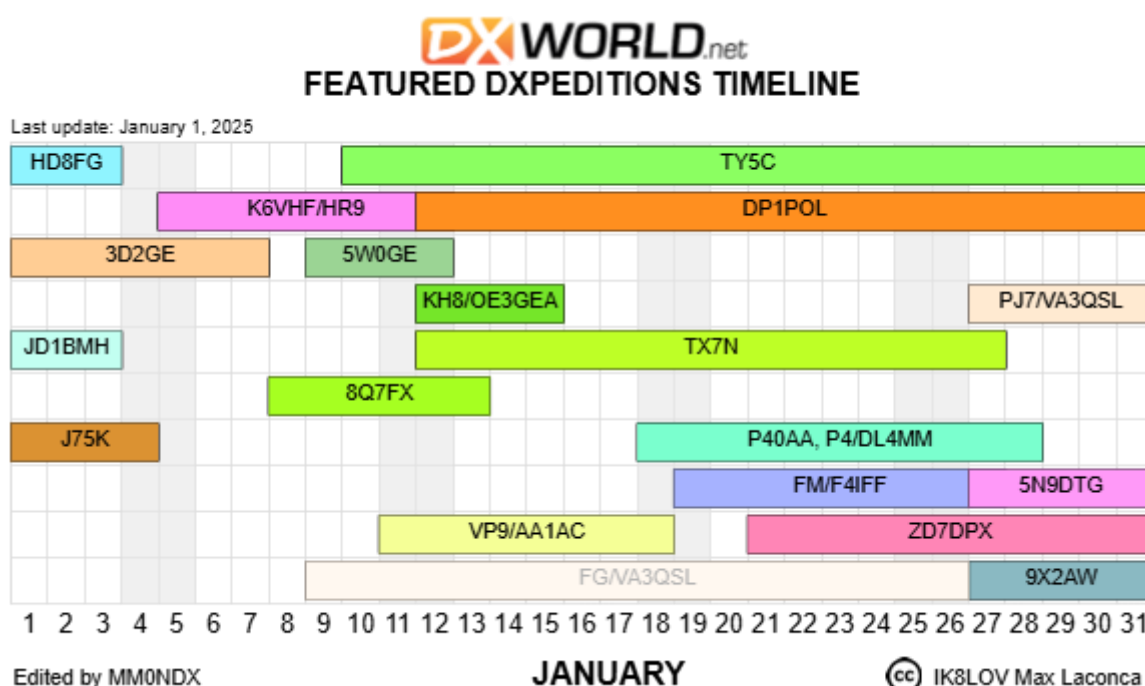

against travel to Mozambique, we have concluded that the risks associated with carrying out the expedition are too high. The safety of our members and team is our highest priority. The situation in Mozambique has become unstable due to recent presidential elections leading to demonstrations, roadblocks, looting, and vandalism. Furthermore, a recent prison riot near the capital city of Maputo, which resulted in the escape of several thousand prisoners, only underscores the uncertainty in the region. Additionally, the owner of our planned accommodation has informed us that the situation is unclear, with supply issues and occasional roadblocks.

A youthful adventure in amateur radio by Sabbir S21ACP

In December 2024, I had an amazing opportunity to participate in the **S21DX IOTA DXpedition** to Bangladesh's Dhal Char Island (AS-140). This journey not only represented a significant turning point in my amateur radio activities but also a highly personal experience that strengthened my resolve, broadened my technical understanding, and enhanced my respect for the international amateur radio community.
